Jedi Holocrons You can use Jedi Holocrons to find works of art and sometimes chests throughout the game, you can find Holocrons, destroying things, going hidden areas etc. you can get Hlocron just by going through it. It will display the th Holocrons you have from how many there are in the game, which is 200. Holokrons are found at all levels, including prologue. How to defeat Rama Kota Rama Kota is a tough old man, but you are going to put him out of his misery anyway. First, I would suggest jumping around like a maniac and attacking him every 5 minutes. If you don't want to do this, lock it up and unleash all the power of the dark side on it. If you fight on a lightsaber, if you beat him, electrocute him so he knows who he's dealing with. Every once in a while I suggest running away to get health because it will take some time to kill it. Use the saber toss for long-range attacks, and repel or what it is to cause an earthquake on the cat. And if it works, throw something at him. Follow this and it will be blind in floating in space for a long time. Destroy the tractor beam on the Death Star you have to destroy the tractor beam. First, you have to break the force field in front of the tractor beam, using your force push against the power field generator, which is on the left edge of the force field and on the opposite side. After breaking the force field in front of you will be three large generators. Force capture and throw all three to destroy. There will be TIE fighters flying past you on the platform. Look through their fly zone and you will see two small generators left and right. Force grab the TIE fighter as it flies past and forces to throw in the generators to completely destroy the tractor beam. Light damage when faced with an enemy that has a lightsaber can be difficult to hit them with a lightsaber. When you are in a saber or power lock click the buttons on the screen over and over again. Note, because sometimes they will change. Once you win the saber/lock force your opponent will be stunned. Use the Power Sprint (R1) and attack them and then quickly click the square. Do it over and over again and you will beat the bad guys quickly. Light points of force reach the checkpoint, which is just in front of a large group of enemies. Deliberately perish in Battle. Every time you respawn at a checkpoint, your Force Point total will remain intact. Repeat the battle to build your points of power.
